NEAUVIA®

HYDRO DELUXE

This information is intended for healthcare professionals only.

NEAUVIA®

WHAT IS HYDRO DELUXE?

An innovative skin booster from a combination of hyaluronic acid and CaHA designed for superficial use to significantly enhance skin hydration and quality and simultaneously stimulate collagen for skin rejuvenation.

The result is the skin looks refreshed, brighter, and healthier, with fewer signs of fine wrinkles.

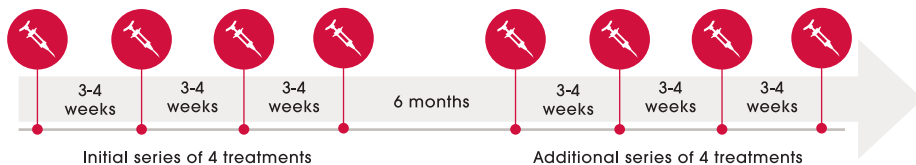

What is skin revitalisation?

Revitalising is intensive nutrition and hydration of the skin. It is a non-surgical treatment that provides intense hydration, resulting in smooth, glowing skin. Unlike other dermal fillers, revitalisation does not play a role in shaping or contouring the facial structures.

Restore and protect

How does it work?

Hyaluronic acid is a glycosaminoglycan naturally found in the skin. It has the ability to hold water. When injected, it not only provides moisture to the skin, it helps retain it, improving the overall hydration levels.

Studies have shown that hyaluronic acid also induces fibroblasts to produce collagen which enhances the strength and elasticity of the skin. It has anti-oxidative, anti-inflammatory, and wound healing properties.¹

Why Neauvia Hydro Deluxe?

Neauvia Hydro Deluxe contains 18 mg/ml of pure hyaluronic acid, enriched with 0.01% of calcium hydroxyapatite and two amino acids – Glycine and L-Proline.

This composition activates and supports the natural processes of collagen production, resulting in firmer, smoother skin.

Hydro Deluxe Benefits

- Stimulates fibroblasts to produce collagen, elastin, and elastic fibers
- Deep hydration
- Restores skin quality to aging skin
- Improves skin elasticity
- Non cross-linked sodium hyaluronate that can be used on the body and the face

Hydro Deluxe patient information FAQ:

Q: What is a Hydro Deluxe?

A: Hydro Deluxe is an injectable skin booster in hydrogel form that enhances skin appearance by restoring hydration, improving texture, and evening tone.

Q: When will I see results?

A: Immediately after the session, with a gradual improvement in the next 2 to 3 weeks.

Q: How long will it last?

A: The effect of a linear HA injectable will last for 3 to 4 weeks; 1 or 2 more sessions per year are recommended, 4 weeks after the last injection.

Q: Who is suitable for the treatment?

A: All patients of any age and ethnicities seeking better skin quality.

Q: What areas can be treated?

A: Any area of the body is suitable for a skin booster, depending on the intended use of the product.

Q: What happens after the treatment?

A: The micropapulas of the product will be dissolved in 48 to 72 hours, triggering the hydration and revitalisation of the epidermis layer.

Q: What is Hyaluronic Acid?

A: Hyaluronic acid is a naturally occurring polysaccharide present in many areas of the body; in particular, the skin. Hyaluronic acid is required to keep hydration, which helps maintain skins young, turgid and resilient appearance.
