

Q&A

01 How is the pain during the Oligio procedure?

Oligio's unique intelligent cooling system and vibration mode minimizes pain, allowing immediate treatment without a separate anesthesia procedure.

02 How long does the Oligio procedure take?

Oligio is a fast procedure and takes about 20 minutes for facial treatment. However, it may vary depending on the treatment area and the number of shots.

03 What should be noted immediately after Oligio treatment?

There is almost no swelling or bruising, so you can wash your face and make up right away, and it does not interfere with your daily life. However, for quick skin regeneration, please refrain from excessive exercise and alcohol consumption, and apply sunscreen carefully when going out.

04 What is the age range for Oligio treatment?

We recommend Oligio treatment from the mid-20s, when aging begins.

Oligio

Experience
ABSOLUTE TIGHTENING

Lift Up, Life Up!

Eyes, Eyelids | Entire face | Forearms, Thighs

Recommended for these people

- ☐ with busy work and frequent appointments,
but do not have enough time to invest in skin care
- ☐ signs of aging on forehead, brows and nasolabial folds
- ☐ want to increase the elasticity of entire face
- ☐ worry about sagging skin problems at the chin,
forearms, thighs, and abdomen
- ☐ want to have a painless procedure w/o surgery
or injection
- ☐ dislike burdensome recovery time
- ☐ want to improve pores and skin texture at the same time
