Ultherapy
Ultherapy®

'SEEING EVERY DETAIL MATTERS'

We mean it: every detail. From face shape, skin thickness, and bone structure, to the SMAS layer 4.5mm deep within your skin – our aesthetic physicians pay attention to it all. By using real-time imaging, we see all the details of your skin so we can treat it with precision and confidence.

The more we see,
the better the results.

SEE

ULTHERAPY® *For Her*

UNIQUE. PERSONALISED.

Everyone's skin is unique. Whether it's through the day, or over the course of a year, we understand that your skin has changing needs. At Ultherapy®, we don't believe in the philosophy of one-size-fits-all. Instead, each treatment plan is hyper-personalised so you can achieve the skin lift you truly deserve.

Embrace your signature look and lift it to the full potential because it's your skin, your way. Be empowered to feel the most confident through your own uniqueness with Ultherapy® For Her.

ULTHERAPY® *For Him*

DEFINED. PERSONALISED.

Ultherapy® is the only personalised skin-lifting solution that uses imaging data derived from your skin's composition to create a treatment plan based on what your skin needs. By focusing on real-time visualisation, our aesthetic physicians can examine the structure and anatomy of your skin in order to assess your needs and personal goals. Every step of your treatment process will be tailored according to how you want it and when you need it.

After all, skin lifts are for men too. With the current cultural swing towards male self-care, let us shift the focus to identifying your personal ideals and hyper-personalising your lift with the power of precision made personal. Own your unique brand of confidence like no other. Express your best self effortlessly and define your winning edge with Ultherapy® For Him.

SKIN

Your Skin, Your Way

Uses real-time visualisation of your skin's composition to tailor a treatment plan with you.

Minimal to No Downtime

Non-invasive and non-surgical. Precisely! targets areas of your skin based on your treatment plan.

Gold Standard^{2,3} with Proven Track Record

High patient satisfaction from over **2 million successful treatments**¹⁰ performed worldwide.

- ✓ **7,800+** systems sold globally.
- ✓ **150+** patents. 50+ clinical studies.
- ✓ **90+** peer-reviewed papers².
- ✓ And over **95%** patient satisfaction one year after treatment⁴.

Loved by millions.
Backed by science.'

"Ultherapy's Hyper-Personal Lift treatment is tailored individually & only to your face – respecting your own anatomy, finding your wishes – just for you!"

- Dr Tatjana Pavicic, MD, PhD

Before treatment

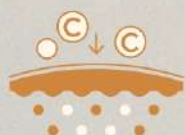

60 days after treatment

Lift from deep within

Other non-invasive and minimally invasive treatments such as Lasers and Radiofrequency Skin Tightening are limited to treating the dermis (depth < 3 mm). Ultherapy® delivers localized heating at precise depths of 1.5, 3.0, and **up to 4.5 mm—with no effect on surrounding tissues or the skin's surface**—targeting both the dermis and the foundational tissues where skin laxity (or looseness) begins.

Stimulate a collagen comeback

Ultherapy® is the only skin-lifting treatment that achieves temperatures of **60-70°C at depths of up to 4.5mm**, the optimal temperature range for collagen contraction and denaturation. Bypassing the skin's surface, Micro-focused Ultrasound energy is applied to target tissue layers, initiating the formation of new collagen.

*Individual results may vary

90 days after treatment

180 days after treatment

Increase collagen synthesis by 42%

Data from a unique Ultherapy® study demonstrated an average **1.4 times increase in the rate of collagen production** in the treated vs. untreated sides of the face⁵. The rate of production for collagen Types I and III—those types most closely associated with the effects of aging—**increased 42%** in the side treated with Ultherapy®.

Enjoy long-lasting results

Ultherapy® is the only U.S. FDA-cleared^{6,7,8}, non-invasive skin lifting treatment that uses **Micro-Focused Ultrasound with Real-Time Visualisation (MFU-V)** technology to treat the same deep tissue planes as a modern facelift. The production of new collagen commences immediately, and proceeds through three phases that **can produce visible results for a year or longer.***

'HERE ARE YOUR QUESTIONS ANSWERED'

1

Is Ultherapy® safe?

Ultherapy® is a proven, FDA-cleared^{6,7,8} treatment with a well-established safety profile. It is currently marketed worldwide in more than 80 countries, with over 2 million treatments¹⁰ performed globally to date. In addition, ultrasound energy has been used in the field of medicine for more than 50 years.

2

How is Ultherapy® different from other facelifts?

Ultherapy® is a hyper-personalised skin lifting treatment as it is the only non-invasive aesthetic treatment that uses Micro-focused Ultrasound imaging technology, a time-tested ultrasound technology that stimulates the natural formation of new collagen deep below the skin's surface, allowing aesthetic physicians to accurately see the layers of tissue targeted during the process and treat it precisely¹. This ability to see and treat precisely where needed is what enables your treatment to be personalised according to both your current needs and your future goals.

3

How long does the procedure take? What's the down time for recovery?

The procedure takes about 30 to 90 minutes, depending on the area treated, and there is minimal to no downtime⁹ afterward.

4

Is it painful?

As the ultrasound energy is delivered, you may feel tiny amounts of energy being deposited to precise depths, stimulating the collagen-building process. Comfort levels vary from person to person, but the sensation only lasts while the ultrasound energy is being delivered.

5

Are there any side-effects?

There may be slight redness that typically resolves within a few hours following the treatment. Some patients may have slight swelling, tingling, or tenderness to the touch, but these are mild and temporary in nature.

6

How long does it last?

The treatment can produce visible results for 12-18 months*, depending on the individual's own collagen production. This process takes time, so results can become more apparent over two to three months post-treatment. Future touch-up treatments can help provide more control over the aging process.

*Individual results may vary
